GORILLADOX™
Quality & Safety Management Software for the Food Industry
from CERT ID Solutions
Integrated Quality, Supplier, and Document Management

BENEFITS

- Manage your food safety plans, workflows, SOPs, GFSI documentation and more in a single automated system

- Reduce risk of non-compliance—be thoroughly prepared for FSMA, GFSI or any audit

- Replace costly, time-consuming manual processes

- View metrics showing which suppliers offer best value at lowest cost

- More effectively manage customer complaints

- Easy to implement and use — designed by a plant manager for plant managers and staff

"We just finished our first SQF audit. I am amazed how any company passes without Gorilladox. The program makes you look professional and well prepared. Everything is so efficient and organized. It made the audit almost painless. And yes, we did pass!"
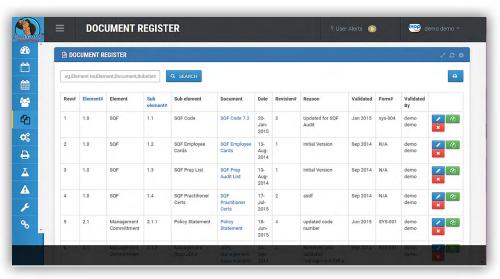

—Dustin Weber,
Plant Manager

Paperless Management of Audit Data

Are you audit ready? Gorilladox is a paperless, cost-effective alternative to current QA documentation and supplier information management practices. With Gorilladox, you'll stay on top of food quality and safety systems management throughout the year, ensuring you are well prepared for audits. Gorilladox is used by hundreds of companies that have successfully passed GSFI and other certification audits.

Features:

- Comprehensive management of audit data, including tasks, documents, and contacts, along with robust user comment, feedback, and review tracking

- Instant email alerts and preprogrammed templates that replace many SOPs and forms

- Optional pre-written templates for GFSI and HACCP plans

- Cloud based, 24/7, secure, accessible on mobile devices, and easy to use with minimal training

- Market proven, used by hundreds of companies to pass audits—at a fraction of the cost of most comparable systems

Gorilladox data screens and dashboard capture essential information, and are intuitive and easy to use

GORILLADOX FEATURES

> Beverage Manufacturer

## Add Efficiencies to Your Supplier Management System

- Notify new suppliers to submit all qualification documents
- Notify existing suppliers when updated documents must be re-submitted
- Automatically create Corrective Action Requests (CARs) if renewal dates pass
- Automatically rate suppliers based on prompt or late replies
- Easily forward documents

Gorilladox at a Glance

- Gorilladox has built in all the GFSI compliance requirements element-by-element, for each scheme, so that you can link documentation, records, and actions to their proper section
- Stores and organizes data required by food safety, regulatory and certification programs including SQF, BRC and HACCP
- Electronically manage thousands of GFSI-required documents and records
- Review dates for all documents and procedures stored. Colored-coded alerts on the Gorilladox dashboard alert you of expiring documents, procedures, and more
- Ensures that all documents will be up-to-date at your audit
- Documents are available to auditors at the click of a mouse, reducing audit time and expense
- Pre-loaded documents and codes for these programs are updated automatically, ensuring accuracy
- Create customized programs and cross reference with GFSI code sets, including HACCP, HARPC, and all SOPs

Ongoing Support and Consulting

CERT ID Services is committed to providing ongoing support for every system implementation. We know what it takes to make your job easier and save you time and money. Gorilladox's principal developer is an industry veteran with 20 years of hands-on experience managing food manufacturing facilities. He and his team of food safety consultants are available to help you maximize the benefits of using Gorilladox Quality Management Software.
